For the 85 years of Novokramatorsky Mashinostroitelny Zavod existence, 105 rolling mills for various purposes have been produced, including powerful slabbings and wide-strip hot rolling mills, plate mills, bloomings, continuous billet mills, middle-section billet mills, wide-strip cold rolling mills for rolling ferrous metals, aluminum and its alloys, a number of units for processing sheet and long products. Equipment under NKMZ brand successfully works at the largest enterprises of CIS countries and abroad. At the wide-strip hot rolling mills constructed for Novolipetsk, Cherepovets, Magnitogorsk and Krasnoyarsk steel mills, the highest productivity has been achieved, new technologies have been implemented.

All NKMZ mills are equipped with automated rolling process control systems (APCS).
